April 11, 2013

Insurance companies are definitely a very important component in a business relationship. I had a commercial rental loss and the insurance folks were quick to respond, but also I was quick to understand that I did not have the tools to understand and expedite the process.

Adjusters International handled the claim completely. Randy Gower and I set a goal for the claim to satisfy my interest. The goal was exceeded on a net basis and the best part was all I had to do was take the check to the bank.

Adjusters International has the tools to make the claim in your favor and not the insurance companies. The insurance company will take care of you on a line by line basis, but the proof of the size of the loss is Adjusters International's job!

Very satisfied,

Eric Engles
