TO WHOM IT MAY CONCERN

We had gone through the most devastating crisis in a business. I lost it all in the fire... I was hit like a ton of bricks to see my life's work down in flames and frankly panicked on how and if I could move forward – emotionally, financially, operationally.

We received a referral to Greenspan Insurance Adjusters and that was the beginning of the long march back to where we were two years ago. They provided sound guidance and confidence when we needed it most.

Handling the ins and outs of the insurance policy, our options, and paperwork were just too complex for us. Greenspan negotiated with the insurance company and interpreted our coverage (which is frustratingly confusing) to our best advantage

They really helped us get the maximum support from our insurance company so we could rebuild and focus on what we do best... run our business.

Thank you Greenspan
