Dbba /Pebble Lake Take Five

1603 Pebble Lake Road

Fergus Falls, MN 56537

On May 11, 2016 I had a mechanical engineer working on my cooler, when we had an explosion that totaled my convenience store.

I thought I had a good insurance company, but learned differently when we had a claim. They offered me \$200,000.00 less than what Globe settlement got for me.

Globe Midwest called me May 12, 2016 to tell me about the service they would provide for me. Steve Green flew in on May 13th and waited 4 hours while we were busy with the fire inspector to talk to us. When we started talking I was very skeptical. He did not pressure us into signing and the next day we talked to an attorney to see what they had to say about them. He recommended hiring someone.

Steve had many letters of recommendation and we called one to see what they had to say. They highly recommended Globe and said it was the best thing they had done when they had fires in their business.

A very efficient team came in and took over the inventory process. Then Chuck Sorrell took over and handled all the issues with the insurance company. He answered all of our questions and was there for us through it all. They got our payments and understood what the policy provided for and made sure we were paid what we had coming.

By the middle of December, we had everything settled and are very satisfied with the job that everyone at Globe did for us. They were very professional in all of their dealings with us.

I would recommend Globe to anyone who is in need of their services. They are worth the money.

Feel free to call me anytime. Bill @ 218-731-1799
