To Whom It May Concern:

This letter serves as the highest recommendation for the services provided by The Greenspan Company. Our losses involved the destruction of three newly constructed homes of approximately 5,400 square feet each. As a developer, we work with a multitude of sub-contractors and suppliers. Greenspan was instrumental in compiling a comprehensive report from the deluge of paperwork and reports submitted by us which incorporated sub-contractor and supplier documentation.

I truly believe that the teamwork and talent of Greenspan helped expedite our claim and in addition created a less stressful atmosphere under such tragic circumstances.

Again, I would not hesitate to endorse the services of The Greenspan Company to anyone involved in loss of property. It is comforting to know that The Greenspan Company will be there should we need them again.

Respectfully Yours,

Cal-Coast Development Group, Inc.
